

IL Daily Check-in

With the installation of our new emergency call system, Independent Living units will also receive a daily check-in button used to inform the front desk that you are safe and well.

How it Works

Each morning when you wake up, press the check-in button near your front door.

The community care team will see that you checked in, letting them know you are safe and well.

What if I forget to check in?

If you do not check in for the day, the community care team may call or visit your unit to confirm that everything is okay and that you are safe.

What if I have an emergency?

If you have an emergency and need help immediately, please use your personal alert pendant or press the help button(s) installed within your unit.
