

# Observations & Nurse Escalations

Caregivers can now catch potential changes in a resident's condition and escalate them directly to nurses for faster triage & follow-up.

## Caregivers/CNAs

Select any new changes in a resident's condition and add a note to explain the change. Your note will go to nurses.

## Nurses/MedTechs

Get notified of any changes observed by caregivers on the Today Page. Claim observations promptly, follow-up as needed, then resolve.
