

# Hello Sage!

Sage is a rapid response nursing call system that quickly connects residents to care team to get assistance when you need it.

How it works:

**01** If you need help, you will press a button. It's as simple as that.

**02** Sage creates an alert so the care team gets their request in real time.

## One to Wear, Two for Your Apartment

**Personal Pendant**

Worn throughout the day, your pendant keeps you safe and connected to your care team. Pendants are water resistant and can be worn in the shower.

**Wall Button**

Wall buttons alert care teams in places like your bedroom and bathroom whenever you need help or assistance.
