

# Hello Sage!

**We're thrilled to introduce our new nursing call system, Sage!**

This modern call system will replace the existing call system and is set to be installed in the near future. We expect Sage to be an exciting update to our community that will highlight and enhance the incredible care that you provide to our residents.

## Something New for You and for Residents

### Care Team

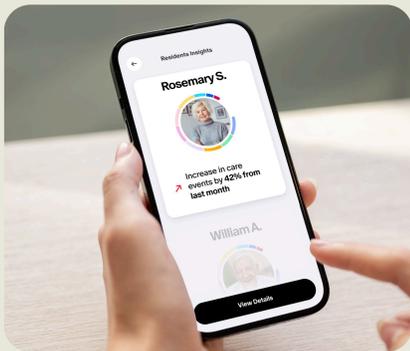

You will have access to new devices to use the Sage system. These Sage devices will be used to resolve alerts as well as many other helpful new features to make providing care easier for everyone.

### Residents

Residents will receive new personal pendants and alert call buttons installed in each of their units and throughout the community.

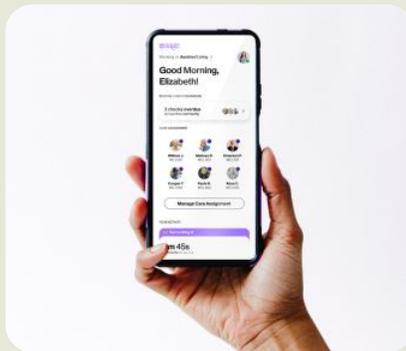

## Why We Think You'll Love Sage

### Easy to Use

The Sage app is designed with your busy day in mind. The app is as easy to use as most common social media apps.

### What You Need

Information such as DNR status, emergency contacts, recent alert activity, and more are all available from the phone in your pocket.

### Recognition

Sage collects the "little things" you do for your residents every day and highlights that work for managers to see and recognize.
